2006 CONSUMER ELECTRONICS SHOW

This year's Consumer Electronics Show was a big hit as expected. As everyone knows this show debuts all the latest in technology for all the gadget geeks out there. From car audio & cell phones to video cameras it's all here and so were the All-Stars working hard for their sponsors to give them that much needed edge to stand out in the jammed packed Las Vegas Convention Center.

The team facilitated several of the team sponsors and partners with demo vehicles, sport bikes, and models. VIVO ELECTRONICS acquired the services of All-Stars model Joann and ECLISPE AUDIO brought in Miss Kai. POLK AUDIO setup shop outdoors with a school of vehicles sporting some really cool eye-catching installs.

The All-Stars worked hard even promoting for several other of their sponsors that were not able to attend event. All the models and members in attendance looked sharp and crisp in uniform and REAL WHEELZ apparel. Sponsor logos and banners were in heavy circulation throughout the event thanks to the hardest working marketing team in the industry!

MODEL DIVISION

The All-Stars Model Division used one of the few brakes that they get throughout the year to hold their annual kick off meeting. Some new faces were introduced to the division to handle all the work that Model Director Jenn finds for these ladies. Overall a very productive meeting as many topics were discussed like: upcoming events, booking, and marketing opportunity for models. Look out for another intense output for the season from the Allstars model division as they are serving their sponsors internationally. Check for profiles on these new ladies on the team website available soon!
